## Company Profile

### Who we are, what we do

Libraesva is a leading next-generation security company that specialises in email security.

Since birth, Libraesva has developed its email security gateway - ESVA (Email Security Virtual Appliance) that has stood out in all international markets with steady growth due to our pragmatic approach.

First launched in Italy, that remains the main market, Libraesva consolidated the foreign markets presence opening Libraesva Limited in 2017.

Besides United Kingdom, Libra ESVA is distributed in Austria, Germany, Switzerland, India, Turkey, Saudi Arabia and North America with customers in every region.

Many awards confirm the excellence of Libraesva and of its e-mail security gateway solution: from the renowned Red Herring Top 100 Europe Award, which selected Libraesva among the best start-ups operating in the field of innovation and technology, to the Computing Security Awards in London, where Libraesva won for four years in a row as "Best Antispam Solution of the Year". In addition there are numerous technology awards of the prestigious Virus Bulletin that always reconfirms Libra ESVA as one of the best and effective protection and email security systems on the market.
